Victor Giannakouris Salalidis

Personal Information

Location: Athens, Greece
Phone: +306984384424
Email: victorasgs@gmail.com
Skype: giannakourisvictor

Research Interests

Big Data Management, Distributed Systems, Distributed Data Processing, Databases, Data Mining

Education

Ionian University, Corfu, Greece

- B.Sc. Informatics
  September 2012 - September 2016 (expected)

Skills

Programming Languages

- Java, Python, Scala, SQL

Tools and Frameworks

- **Data Warehousing:** Hadoop, Hive, Elasticsearch, MongoDB, MySQL
- **Data Processing/Analysis:** Spark, MapReduce, Mahout, scikit-learn
- **REST/Web:** Django, Flask
- **Cloud Computing:** OpenStack
- **Hadoop Cluster Administration - Monitoring:** Cloudera Manager, Hortonworks HDP, Ganglia
- **OS:** CentOS, Ubuntu Server
- **Other:** Git, SSH, GNU Octave

Special Skills

- Big Data Development, Machine Learning, Data Mining, Linux System Administration

Professional Experience

Researcher — **CSLab / NTUA**
National Technical University of Athens, Computing Systems Lab — June 2015 to Present

- **Research:** Spark , Database Systems, Multi-Engine Analytic Workflows
- **Projects:** ASAP(A Scalable Analytics Platform) http://www.asap-fp7.eu/

Software Engineer — **isMOOD Data Technology Services**
March 2014 to October 2015

- **Data Collection**: Development and optimization of company's web crawlers
- **Data Integration**
- **Frameworks/APIs**: Scrapy, YouTube Data API, Facebook Graph API, Disqus

Volunteer Experience

Microsoft Student Partner — **Microsoft Hellas**
October 2013 to October 2014

- **Events:** Event planning and presenting Microsoft technologies about Windows 8/Windows Phone Development with C#, XAML and Visual Studio
- **Development:** Development of two Windows Phone applications and two Windows 8 applications

Publications

2015

- Evangelopoulos, X., **Giannakouris Salalidis, V.**, Iliadis, L, Makris, C., Plegas, Y, Plerou, A., Sioutas, S. "Evaluating Information Retrieval using Document Popularity: A case study using MapReduce". *Engineering Applications of Artificial Intelligence, Special Issue on Mining the Humanities: Technologies and Applications*(Submitted)

2014

- **Giannakouris Salalidis, V.**, Plerou, A. and Sioutas, S. "CSMR: A Scalable Algorithm for Text Clustering with Cosine Similarity and MapReduce". *Artificial Intelligence Applications and Innovations 2014, Springer.*
- Magkos, M., Kleisiari, E., Chanias, P., **Giannakouris - Salalidis V.** "Parental Control: Ethical, Legal and Technological Aspects - The Good, the Bad and the Ugly". *6th International Conference Information Law and Ethics(ICIL) 2014.*

Projects

Open Source - GitHub

- **CSMR**: OpenSource project for text clustering on Hadoop Clusters. Measurement of document pairwise cosine similarity using MapReduce. Implementation of publication with title "CSMR: A Scalable Algorithm for Text Clustering with Cosine Similarity and MapReduce". Technologies used: **Java, Mahout, Hadoop - MapReduce**

- **G-LDA**: Project about topic modeling using Latent Dirichlet Allocation(LDA). A REST API is also provided. Technologies used: **Python, gensim, flask**
- **Flutrack**: NoSQL infrastructure design and implementation of the Flutrack project. Flutrack is a system for monitoring influeza outbreaks via Tweeter. Technologies used: **Python, Django, MongoDB**

Windows Store

- **Pocket Combinatorics**: Windows Phone application implements basic combinatorics formulas
- **Bool is Cool!**: Windows Phone application implements basic logic gates
- **Blood Groups Compatibility**: Windows 8 application for blood group compatibility testing
- **Genetic Code**: Windows 8 application for DNA sequence transcription and translation

Certifications

- CS190.1x: Scalable Machine Learning — edX - BerkeleyX
- CS100.1x: Introduction to Big Data with Apache Spark — edX - BerkeleyX
- MAS.S69x: Big Data and Social Physics — edX - MITx
- HAISS 2013 LEARNING (AI) — EETN - Ionian University
- Certificate of Competency in English, — University of Michigan
- Cambridge ESOL Entry Level Certificate in ESOL International, — University of Cambridge
